CATALOGUE DESCRIPTION

Content: This four-part class will provide participants with an in-depth overview of the current evidence-based treatments for adults with eating disorders, including Cognitive Behavioral Therapy, Dialectical Behavior Therapy, Motivational Interviewing, Acceptance and Commitment Therapy and more.

Participants will be required to complete approximately eleven hours of synchronous class time and four hours of asynchronous class. Additional readings (approximately 1.5 hours) will also be assigned to enhance each in-person class.

Participants will learn assessment for determining what level of care might be appropriate for a particular client, as well as ways to facilitate both a step up or adjustment down in a patients level of care—while maintaining progress.

Participants will learn counseling interventions and treatment strategies for common symptoms of eating disorders and how to work well with other providers as part of a larger treatment team. Involving friends and family members as appropriate will also be addressed, as well as treating common co-morbidities.

Prerequisites: None.

Credits: 1 semester hour.

COURSE STRUCTURE

This course is required for completion of the L&C Eating Disorders Certificate. L&C students may also take the course as an elective. This one-credit course meets virtually over four Fridays/Saturdays in addition to self-directed and on-line activities outside of the class sessions. Didactic presentations will be balanced with group activities and experiential practice.

COURSE OBJECTIVES

At the end of the course, students will be able to:

1. Have a clear idea of standards of care and levels of care in the treatment of eating disorders.
2. List six cognitive distortions and alternatives that could be used in individual, family and/or group therapy.
3. Have a clear understanding of at least four evidence-based treatments for eating disorders.
4. Knowledge of how to diagnose eating disorders and conduct a specific eating disorder evaluation.
5. Discuss how personal dieting/eating disorder history, food beliefs/rules, and body image could show up in their interactions with clients.
6. Able to create an appropriate treatment plan for the different eating disorders.
