Key Required Assignments/Student Learning Outcomes

These assignments are required for the course, but will not be the only

<u>requirements/expectations</u>. The chart below lists the assignment, method of submission, and benchmark score/grade. These assignments are set up for upload to

Research and Assessment		Proficient (A)	Benchmar k (B)	Emergin g (C)	Inadequa te/Fail	As evidenced by:	Review and Remediation
Goal 6 of 7							
Students demonstrate an understandin g of assessment and evaluation in mental health counseling	Practicum year	Cumulativ e score 90- 100%	Cumulative score 80- 89%	Cumulati ve score 70-79%		MHC 541: Introductio n to Assessment Midterm and Final exam scores	Assessment Chair Review/Referr al to BRC or ARC

Research and Assessment		Proficient (A)	Benchmar k (B)	Emerging (C)	Inadequat e/Fail	As evidence d by:	Review and Remediation
Goal 7 of 7							
Students understand social and cultural factors related to assessment and ethical strategies for using assessment in mental health counseling.	Practicu m Year	90-100% Assignmen t scores	80% -89% Assignment scores	70% -79 Assignmen t scores		MHC 541: Test Critique	Assessment Chair Review/Referr al to BRC or ARC

MHC 541-02: Introduction to Assessment

Spring Semester, 2024

Instructor: Jeffrey Christensen, Ph.D., LPC

Class Day and Time: Wednesday 5:30-8:30pm (3 hour weekly;10 weeks; 30 contact hours)

Class Location: York 101

Office Location: Rogers 329

Office Hours: By appointment

Phone: 503-768-6071

Email (preferred): jchristensen@lclark.edu

Prerequisites: MHC 503/MHCA 502; CPSY 506; MHC 513; MHC 550; MHC 535/CPSY 538

Credit: 2 hour

Required Text

Neukrug, E. S. & Fawcett, R. C. (2015). The Essentials of Testing and Assessment: A Practical Guide for Counselors, Social Workers, and Psychologists –3rd Edition. 2015. Stamford. Cengage Learning.

Catalog Description

Principles of psychological assessment as employed in school, clinical, and applied settings. Addresses psychometric concepts such as validity, reliability, norms, and score interpretation. Surveys intelligence, personality, career, interest, aptitude, and achievement tests and reviews alternative methods of assessing competence and person-situation interactions. Contemporary issues such as the validity of instruments for diverse populations and the impact of technology on assessment are discussed.

Course Goals and Objectives (Also Refer to Cover Sheet)

1. Students will understand the basic tenets of structured and semi-structured interviews and how to conduct mental health assessments and inventories, likely seen in a community mental health setting. These assessments include but are not limited to, intake assessments, mini-mental status exams, depression and anxiety inventories, and client satisfaction questionnaires.

- Students will gain a basic understanding of statistical language to critically analyze
 assessments/inventories in terms of reliability and validity, and be able to differentiate overall test
 worthiness (cultural sensitivity & practicality).
- Learn the ethics behind assessment and how to implement assessment measures to aid in diagnosis and treatment planning.

CPSY Department Attendance Policy

Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time may result in failure to complete the class. This would be 4.5 hours of a 45 hour class (3 credits), 3.0 hours for a 30 hour class (2 credits) or 1.5 hours for a 15 hour class (1 credit.) In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness may be seen as an absence that requires make-up work.

Disability Services Statement

If you have a disability that may impact your academic performance, you may request accommodations by submitting documentation to the Student Support Services Office in the Albany Quadrangle (503-768-7192). After you have submitted documentation and filled out paperwork there for the current semester requesting accommodations, staff in that office will notify me of the accommodations for which you are eligible.

Assignments & Activities Scale

Attendance

Attendance and general participation is expected. Coming to class ready to discuss topics, contribute to class discussions, and critically analyze assessments reviewed is expected. In addition, you will be administering several assessments that we review in class in small groups, to better familiarize yourself with the skills necessary for gathering information that can effectively guide treatment planning and diagnosis. Attendance is mandatory (see course expectations).

Technical Requirements students need to be aware as we begin a new virtual semester.

Tech Requirements: The main learning platforms for this class will include Moodle and in the advent of inclement weather, or other circumstances, Zoom may be utilized. Moodle will be used as the primary course site and is where students will find additional readings and resources based off class discussion. Log in to moodle.lclark.edu using your Lewis & Clark ID to access our class.

Mid-term exam (25% of grade)

A mid-term exam which consists of multiple choice, short-answer, and essay questions and will be administered on the 5th class day.

Final-exam (25% of grade)

A take home final examination will be handed out on the 9th class and will be DUE beginning of class on the final week. It is okay to refer to the textbook and powerpoint presentations to finish this exam, but you are to work on this exam alone.

Test Review (35% of grade)

A critical analysis of one assessment of your choice, that investigates its test worthiness (validity, reliability, cultural sensitivity, practicality). This analysis can be either written in an academic paper format (APA 7th edition) or done on a PowerPoint (or Google Slides). You will research and find an assessment online to review. You are expected to refer to a minimum of five peer-reviewed sources. This review will include;

- 1. Identifying information (name of test, what test is trying to measure, intended population group, type of information yielded, how it is administered and scored, identify publisher is there is one).
- 2. What and for whom is this test intended? What are the current issues surrounding what's affecting this population (prevalence rates, demographic information, etc.).
- Provide evidence for reliability and validity. Try to establish at least three different types of
 validity and evaluate each. Construct Validity should be included and if it's not possible to include
 this type of validity, explain why.
- 4. If there was a manual, how useful was it for you as a test user? How well does it portray the uses and limits of this test, given the evidence in 3? If there was no manual, how readily available was this information presented by the author, or other authors' review of the test?
- 5. How were issues related to marginalized populations discussed/handled? Is this a practical test to administer (e.g. cost, time, appropriate for intended client age or other demographics).
- 6. Your evaluation. Informed by the basis of the information presented from the multiple sources, is this a worthy test to use on clients? If this is a specialized assessment, would you consider it to be useful for those of that specialized population? For what purposes and with what clients would you consider this test <u>not</u> to be useful? What other kinds of information would you want to combine with test results to help you or your client make decisions resulting from an assessment? Present this information section as an informed expert (which you are!).

Group Presentation (15% of grade)

A group of 4-5 students will conduct an evaluation of a fictitious character (from a movie, television show, book, etc.) that addresses the following:

- Assessment questions: Given the unique characteristics of this character, what questions come up given their presentation? What kind of assessments/target areas would be most useful for helping this character be successful in treatment?
- Assessment strategies: Taking the specific personality traits of this character into account, what strategies are needed to ensure valid and reliable results?
- Assessments and results: What are the specific tests your group decided to use to help this
 character. Why? Account for test worthiness areas. What do the results mean for this character and
 how might they contribute to their therapy?
- How you will present these results to your character, accounting for their specific personality traits.

Assume you have three hours with your character, so as not to go too overboard with testing. You are encouraged to be creative and have fun with this activity, but approach the conclusions with seriousness, using the data you have. For your presentation, a powerpoint covering these areas, with screenshots of the actual tests and/or questions answered by the character are recommended. You may role-play the test administration, or presenting the test results to your character instead. There will be five groups and presentations are expected to be around 20-30 minutes each. This will take place on the last day of the class.

Course grading scale

95-100% = A

90-94% = A-

87-89% = B+

84-86% = B

80-83% = B-

77-79% = C+

74-76% = C

70-73% = C-

 $\leq 69\% = F$

Course Outline

This outline is designed to be our schedule for the Spring 2024 semester. Based off class discussion, additional readings may be assigned. If there is a change needed, it will be announced in class.

DATE	TOPIC(S)	ASSIGNMENT
1/10	Introductions, Class Overview, Syllabus	Course Syllabus
1/17	History of Assessment, Assessment Process, Ethics, Cultural Considerations, Intakes Group formation LC Intake Assessment/Assessments via Tele-Health	Chapters 1-2 ACA Code of Ethics; Section E, (CACREP 7a, 7f, C1e)
